Abstract

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1601 UV-Visible Spectrophotometer. The concentration of chlorophyll was expressed in mg g⁻¹ of dry weight.

Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair and views the screen through a video camera. The screen displays the target and the starting position of the hand. The hand is moved from the starting position to the target position. The video camera records the hand position and the target position. The video camera is connected to a computer which controls the video camera and the hand movement.

This is a black and white aerial photograph showing a coastal area. A road runs along the shoreline, and a building is visible near the water. The image is somewhat blurry and has a grainy texture.
